Whale Falls

- Go with the first idea
- Include the history and “animals related to whale falls” section from wiki article
- Make typeface color brighter
 - Keep it blue or experiment with white/lighter blue
- Find a web compatible typeface that matches the theme like the one from the mockup (fontquirrel)
 - Use that one for headlines, maybe another, more legible typeface for the large paragraphs
- Have it continuously scrolling if possible
 - Like the Box Model assignment we did with the solid blocks of color
 - Maybe floating images or text (possibly jQuery/javascript?)
- Include pictures
- Higher quality images for background
- You might be able to play with transparent boxes to get an underwater effect
