### Whale Fall

Since this is a short article, I'd like to make a site that can be clicked through with easily-legible text. Possibly with large images to give a sense of scale to what whale falls are. Infographics of the scientific elements as well.

Home page – Brief explanation of what a whale fall is and pictures.

History – Describing the discovery of the first whale fall, where it was, etc.

Ecosystem – Sectioned off page with each stage of the ecosystem, maybe click through.

Related species – Other species that have similar “whale fall” effects.
