Notes from HTML Review – The Oscars

Creative Director: Alyse Gellis
Designer: Kelly McGuffog

- Photo slideshow arrows are skipping photos, but not when you click the round buttons
- Get rid of sidebar blue outline
- Sidebar menu needs to move over a little to center
- Sidebar menu is conflicting with home page slideshow – not really sure what's happening
- In smaller sizes and mobile – only use one photo and caption
- On mobile – content text could be larger
- On desktop – could make text column wider to make it less long when you make the window smaller
- Add photo captions to categories section
- Change section title to "venue history" from "venues history"

Notes from HTML Review – Golden Retrievers

Creative Director: Devon Litteral
Designer: Alyse Gellis

- Purple-y red maroon is good
- Make 960px container bigger
- Fonts are good
- Info pages: white is good – try and make text align with pictures at the bottom
    o Align photos with the first sentence instead of the title?
    o Make the section titles the fjalla one font and
    o Try making white box like 90% transparent
    o Make content text dark grey
- Puppies' columns don't work on safari???
- Crop photos to get rid of watermarks
- Make something happen to the photos when you hover over them
- Resize background photo to be bigger
- Less blue space in home page – show dogs feet
- Fix the background – overflow-y: hidden
