Mockup Review Notes

Creative Director: Alex Hammarskjold
Designer: Irina Pavlova

In our meeting we decided that
- We would explore the video option for the desktop home page and have it be short and on a loop
- We will have a photo instead of the video for the mobile version
- The logo will go on the top bar of the page instead of over the image or video
- The gallery page will have a grid of photos that will be black and white and when you hover over them they will become color
- The mobile versions will have the logo go into the top bar, like the desktop versions and the hamburger menu will move to the right
- We also went over specifics for the individual pages and which parts of the text to highlight
