Project Title: Formula Racing

I want my site to be multiple pages with an Introduction/Home page that includes a navigation bar to guide the users to specific topics within Formula Racing. The Wikipedia site I chose includes links to Wikipedia Pages about the specific topics that I will use so that I have sufficient content. I will most likely find images on Google or from the references used on the Wikipedia pages I will be getting information from.

- Home Page/Introduction – Define and provide background about Formula Racing. Content about the two main forms of formula racing (open formula and "spec" formula) and how it is international.
- Formulas Page – Will include information about Formula One, Two, Three (the most known categories in Formula racing) and Formula E.
  - Formula One will include a brief history about the revival of Grand Prix racing
    - History Formula One
      - Grand Prix Racing
      - A1 Grand Prix (now defunct)
  - FIE Formula E Championship (Formula E)
  - Formula Two and International Formula 3000 (both now defunct)
  - Formula Three
- Formula Car Challenge Page – Will include background and information about the Formula Car Challenge and Formula Mazda (which powers the whole challenge)

- Sources – The sources will be included at the base of the appropriate page. It will include the Wikipedia page, sources for photos, and anything else that needs to be cited.
