Creative Director: Claire Cofelice
Designer: Madison Yang

Home Page:
- Clarify that the page functions as more than an image – possibly make it so the logo (or entire page) changes opacity when the user hovers over it. Could also have the words "enter" or something along those lines appear to increase clarity

Introduction
- Consider editing the main photo so that the top edge goes to black – not necessary, up to you

Characters
- Consider how to differentiate current cast members from former ones – will they be on different lines? Will text color change?
- (Option 1): when you click on the character's photo, a box will appear to the right with more information about him/her
- (Option 2): when you click on the character's photo, it will direct the user to the corresponding information below all of the images (i.e. character bios will be listed below)

Seasons
- Higher res. photo
- Seasons listed in breadcrumb bar at top of page
- Season info organized into simpler columnar structure

General
- See what the logo in the navbar looks like if "Minds" is white
