The Beatles page notes

    Logo smaller on the pages other than home page, link the Beatles logo to home page

    Two photos same width on Beatle mania page, same amount of contrast/color

    Same treatment with first photo on member's page and throughout site

    Drop shadow on home page on photo?

    Some sort of hover on the member's page

    Colors good

    Fill in read more when hover on home page

Golden Retrievers Notes

    Change background photo to puppies on beach

    Get rid of upper navigation bar and just put text over the photo

    Move title to either right or left side with links all together

    Move sources to an icon with the other social media icons

    Make text white

    Use water texture or color in top navigation bar on content pages, with white body

    Add more photos to the different pages

    Mobile drop down link on every page
