Project Title: Neon Genesis Evangelion Website

I'd also like to build this site as multiple pages, rather than a long, single page website. There are many graphic resources available on the internet, and with some edits, I think there would be enough assets to build a visually cohesive website with multiple pages. A navigation bar on the top/ side will help the users easily switch between the pages.

Home Page/Introduction – This page will serve as a title card and a hub that connects all the individual pages together.

Plot – It will explain the plot of the show, focusing on “the second impact”.

Characters – The show has a big cast, and while I would like to address them all, focus will be on the three main characters.

Production – Introduction of the creator behind the show, Hideaki Anno & Gainax Studios.

Themes – Religious and mythological themes of the show.

Sources – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.

The goal and the purpose this website will serve is to introduce the general younger public about the show (which originally ran in 1995) and spark new interest.
