### The Buttered Cat Paradox

This is a rather short Wikipedia article. I would like to make a site featuring a number of pages that can be clicked through, but instead of featuring a typical navigation bar, it would link from page to page via interactive image buttons. There aren't that many readily available images on the topic, so I will either edit photos of cats and toast or illustrate them myself.

- Introduction (an overview of the two adages and the paradox that arises from combining them)
  - o Cats always land on their feet.
  - o Buttered toast always lands buttered side down.
- In Humor... (a list featuring bizarre possibilities proposed via humorous thought experiments)
- In Reality... (a list featuring the actual science behind what would happen.)
- Sources (the Wikipedia page, any images, etc)
