

Notes for Designer

- Nice color scheme- will the colors play a role in how the events are organized?
- The font used for “the far future” looks different from the font used in the menu and the centered text stating “earth’s timeline.” Perhaps these should be the same font.
- The home page looks very nice and clean, it would make for a good website if you could continue this clean look throughout the website
- The centered text “earth’s timeline” is not completely aligned with the arrow pointing down. Make sure the alignment is consistent in your final version.
