-Finish website and (try) to make it mobile responsive
-Add footer at the bottom of the page to make it feel more complete and to tell the viewer that he/she has reached the end of the page
-Create a larger margin so that the text is not touching the edge of the page
-Align the bottom of the image with the bottom of text (if possible)
-Align the navbar with the edge of the images/text
-Make the spacing between the images even on the Attractions page and align the full bleed image with the edge of the images/text below it
