Site Review Notes (Katie to Alex H)

- Check quality of backgrounds (either make them smaller or make them higher quality)
- Make stranger things logo clickable to take you home, or add a home button to the menu
- Characters
    - Make the color of the polaroid solid, either white or blue but the border is distracting right now
    - Also line up the characters with the main picture on that page if possible
    - Put the characters in two columns, right now the list is too long and skinny—I wouldn't mind if you made the text columns a little skinner in order to do that
- Responsive
    - Add margin/padding to edges and bottom, right now it's too close
    - You can make the pictures a little smaller if you like
    - Also make sure that there is space between each character
    - Also make background of bibliography smaller /make it the width of the screen and add black to the bottom if you have to but it's weird that it's coming off the page a little bit right now. (will also help with quality)

Overall looking good though!
