

HTML review notes

Creative Director: Kaitlin Yang

Designer: Jessie Kurz

Home:

- The title “STEPHEN CURRY” is too big and covering his daughter’s Riley’s face ( I would either make it smaller or recrop the photo so there is bigger blue empty space for the text)
- Give "basketball star and family man" a hover effect to make it more visually interesting (it could just link to his bio page too)
- Have the nav bar align the title, so it is not awkwardly hanging a little right of the “S” in “Stephen Curry” title
- Love the photo and feeling of the page!

Stat page:

- I would get rid of the gradient background and keep it the light blue for all the other pages
- The responsive of the text is not right
- Increase the line-height and add a little more letter-spacing for the main text
- Should probably make “STEPHEN CURRY” a box or add padding to it so when scrolling up, the photo doesn’t overly with it

Looking forward to see the rest of the pages!
