Mockup Notes
Maggie Jia

1. Make bottom sources footer a photo background

2. Add an x or some sort of exiting fiction to the side of the pop-up images to get rid of it/return to the grid images

3. Number the sources

4. Make sources text a smaller point size

5. Instead of putting the entire url of source, create titles/buttons for it. Make these titles/buttons hyperlinked to the source.

6. If too hard to make the gallery pop up, make bars of info
