Meeting II Notes

- More artsy work of stuff from Jamie Hewlett for the cover page
- Smaller social media text on the enter page
- Specifically says "enter" on the first page
- Side navigation bar one color
  - Text itself could be an accent color
  - Maybe sidebar could be white with black text?
  - Keep the Gorillaz logo at the top of the navigation bar
  - Social media smaller
  - Don't need the secondary line on the nav bar → but should have something? Unclear what
- Panel with images might need to be the same color as the page background
  - No divider between the content and the images panel
- Reduce margins between thumbnail images
  - Good image choices
- Get rid of faint images in the background
- BEBAS NEUE for the header fonts
  - Make the body font something a little more narrow to match the new header
- Up to you to find a more cohesive color palette
- GRAY BACKGROUND!
- Thinner column width
- Slightly stronger milky-ness on thumbnails
- Use dis somewhere
