Site Title: Notable Cases of Unethical Human Experimentation

Gorillaz has been one of my favorite bands since middle school. Beyond listening to their music, I've followed the band mythos and detailed storyline told through their music videos. I want my website to introduce music fans to the Gorillaz world built by Damon Albarn and Jamie Hewlett.

- **Home Page/ Introduction** – provides an introduction to how the band formed with videos of some of their most famous songs
- **The Stars** – bios for the creators: **Damon Albarn** with references to his time in Blur (band), bio for **Jamie Hewlett** with references to Tank Girl (graphic novel), vignettes on some of the frequent collaborators (http://gorillaz.wikia.com/wiki/List_of_Gorillaz_Collaborators)
    - **De La Soul**
    - **Snoop Dogg**
    - **Mos Def**
- **Band members** – including character backstory, how they joined the band, and what they play (also showing how they've grown and changed with the new art styles)
    - **2-D (Stuart Tusspot)**
    - **Murdoc Niccals**
    - **Russel Hobbs**
    - **Noodle**
- **Art Style** – each new album comes with a different style of art. I want this section to have lots of pictures and descriptions that show what's changed
    - **Phase 1**
    - **Phase 2**
    - **Phase 3**
    - **Phase 4**
- **Story Arcs** – I think I'll need help figuring out the best way to sort this information. There are essentially two breaks: the character establishment phase and then the El Manana story that ties directly into the Plastic Beach story
    - **Pre-Demon Days**
    - **El Manana conspiracy**
    - **Plastic Beach**
