Notes from HTML Review
Director: Madison Yang
Designer: Alice Lee

Elements to consider:

- Navigation – try a solid bar at the top

    o   Gray as background color

    o   Different colored title or panel for each page

    o   Making everything a little bit smaller (to not overpower the rest of the page)

- Logo – link Pokemon logo to intro page (if you decide to include it)

- Background images – make more uniform?

    o   Can try having similar landscape or game screenshots (like on the "Games" page) across all the pages

    o   Double check coding for "Origins" page – background scrolls down a little bit

- Images – include images inside the text boxes

    o   Include multiple images on each page – next to relevant sections of the text or just spaced evenly next to the text, from top to bottom

    o   Can just be on the left side of the text (doesn't have to be interspersed throughout the text or anything)
