

Mockup Review

Creative Director: Ruby Rose

Designer: Calvary Fisher

Project Title: Cosmic Latte

- Overall the site matches the simple aesthetics that I was hoping for, but doesn't compromise the designers hand.
- We spoke about
- The designer plans to animate the the lid of the latte cup coming off as the user hovers over the "enter site" text.
- We spoke about changing the pointed star background, I found the star too sticker-like and friendly, it didn't match the feeling of the black background with the circular stars. We also spoke about moving the colors of these two background further away from eachother.
- We talked about expanding the section about the researchers themselves to potentially include other projects that pertain to this one.
- The text on the black background may be too dark to read.
- The ellipsis at the beginning of the of the first information slide should be omitted. We spoke about the color changing to the original cosmic green when the user hovers over the cosmic latte square.
- He can also consider dispersing the bright blue color used in the titles of two of the slides.
- "Sources" is spelled incorrectly.
