

Content Outline- Lydia Kim

Taj Mahal Website

Nov 9th.

I want to build multiple page document since Taj Mahal has diverse points to stress. I will mainly focus on the architecture and design of Taj Mahal, as those pages have most photos and content. I excluded the inspiration, construction, and tourism part of Taj Mahal. The content will include multiple photos, so consistent and clean image layout is needed.

- **Home page:** General information about Taj Mahal. The main page will have one giant photo of Taj Mahal, and site navigation tab will be at the top.
- **Tomb:** The superior architecture and design of the tomb, the main building of Taj Mahal complex. Includes multiple photos.
- **Exterior decoration:** Explains the exterior design of Taj Mahal
- **Interior decorations:** The interior decorations and patterns of Taj Mahal
- **Garden & outlying buildings:** Explains the garden and other two buildings, including photos for each section, all in one page.
- **(History:** Inspiration, construction, later days of Taj Mahal. Three articles in each section. May or may not be included as I want to focus more on the artistic aspect of the building. Without photo more content-driven.)
