

## Mockup meeting notes

So A Ryu – Creative director

Nicole Fox – Designer

### Concept

- the bright colors, patterns and modern design is exactly what I envisioned!
- Typeface work really well

### Suggestions/what we talked about

- I saw more revised versions than the ones uploaded last night, and I like how you highlighted the menu bar that I'm on
  - o It helps me to know instantly which page I'm on
- I like the imagery, and we talked about using more images around the text
- The mobile version's line length could be a little shorter, and maybe the font could be a bit smaller, but I think I can't tell completely unless I see which is better unless we test it out holding the device in our hands.
- How about different background color for each section? Make it more playful. It may or may not work with the modern design, but I was thinking the colors could be pastel so that it doesn't overpower information or the design of the web.

GREAT JOB!!!!!!
