Project Title: Noma Website

I'd like to build this site as multiple pages – not a single page website. It'll be a simple build, with a clean navigation bar at the top that will direct site visitors to other pages. The tabs in the nav bar will include:

1. **Home Page** – a simple home page that communicates the aesthetic of the page – clean and crisp.
2. **About** – detail the history of Noma, list its awards (i.e. 2 Michelin stars, success of its pop-up restaurant in Tokyo), and a short description about the head chef, Rene Redzepi.
3. **Menu** – found here <http://noma.dk/food-and-wine/>
4. **Reserve** – tell visitors to call phone number to reserve, include address of restaurant in Copenhagen.
